

PUSHRAJ RANJAN

Kolkata, India

8579887066 pushprajranjan31@gmail.com [linkedin.com](https://www.linkedin.com) github.com

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java

Frontend: HTML5, CSS3, JavaScript, React.js

Backend: Node.js, Express.js

Database: MySQL, MongoDB, SQL

Tools / Platforms: Git, GitHub, Postman, NPM, AWS, Microsoft Excel, DevTools

cloud-native technologies: Docker, Kubernetes, CI/CD

Core Subjects: OOPS, Operating Systems, Computer Networks, DBMS, Data Analysis

WORK EXPERIENCE

WeMakeover

Remote

Full-time Fullstack Developer

SEP 2025 - PRESENT

- Implemented JWT authentication, Google OAuth, and role-based access control (RBAC) to protect sensitive customer information and ensure secure access to administrative functions.
- Integrated Redis and Nodemailer to enable secure OTP verification, email notifications, and session management, improving authentication reliability and user account security.
- Optimized application performance by 35% using React lazy loading, memoization, and efficient API design, enhancing responsiveness for customer and transaction-related workflows.
- Developed responsive dashboards to monitor customer records, booking activities, payment transactions, and operational metrics, enabling efficient tracking and data-driven decision-making.

WeMakeover

Remote

Intern Software Engineer

MAR 2025 - AUG 2025

- Architected a full-stack service booking platform using MongoDB, Express.js, React.js, and Node.js
- Collaborated with leadership to embed Razorpay payment gateway — completed 100+ test transactions at 100% success and shortened launch timeline by 1 week
- Cut page load times by 35% using React optimizations (lazy loading + memoization)
- Published the application to AWS (EC2, S3), maintaining 99.5% uptime during load tests

PROJECTS

InterviewIQ.AI- AI mock interviews with voice input, scoring, and analytics - [GitHub](#)

Tech Stack: React 19, Firebase Auth, Express.js, MongoDB, OpenRouter API, Razorpay

- Built a full-stack complete AI interview pipeline integrating OpenRouter (GPT-4o-mini) API with pdf.js text extraction and Web Speech API for live speech-to-text dictation, delivered 5 role-aware questions in 18s.
- Developed a credit-based monetization system with Razorpay checkout, HMAC signature verification, and atomic credit increments, gated interview generation behind a 50-credit deduction with rollback on failure.

Support Ticket System - [GitHub](#)

Tech Stack: React, Django REST Framework, PostgreSQL, LLM API (OpenAI/Anthropic), and Docker Compose

- Built a full-stack Support Ticket System using Django REST Framework, PostgreSQL, and React, featuring ticket creation, filtering, search, status updates, and real-time analytics with database-level aggregation.
- Integrated LLM-based auto-classification using API (OpenAI/others) to suggest ticket category and priority with override support; containerized the entire application using Docker Compose for seamless deployment.

EDUCATION

TECHNO INDIA UNIVERSITY

KOLKATA

Master of Computer Applications

OCT 2024 - MAY 2026

TECHNO MAIN SALT LAKE

KOLKATA

Bachelor of Computer Applications – GPA – 8.37

OCT 2021 - MAY 2024

ACHIEVEMENTS AND CERTIFICATIONS

- Solved 250+ Data Structures Algorithms problems on [LeetCode](#), [GfG](#), and [HackerRank](#).
- Achieved **Machine Learning IBM certification** at [SkillsBuild](#).
- Problem Solving (Basic & Intermediate) [HackerRank](#).
